

North Scituate Train Station Canopy

Funding Request Form continue

Summarize how this request benefits the Town of Scituate and meets the goals of the Community Preservation Act.

This funding is a small step toward revitalizing North Scituate Village. Currently, the historical canopy area is not usable. The Friends of North Scituate Village were able to complete phase 1 to 3 with the first funding from CPC in 2019. Due to the pandemic delays happened and prices soared. The finishing of the ceiling with cedar wood is in progress and will be completed by the end of November. Due to the higher prices all the money from the first fund was used to pay for this page 4. To make this place usable, installing lights, two picnic tables and benches and trash cans is a must and will lead to a visible and attractive public space as a gathering area, starting point and stopping point for the walking and biking path from North Scituate Village to Minot Beach and more. It will also attract visitors who take the MBTA from points north to Scituate. This would be a completion of a project that began in 2011. In addition to finishing this project as a historical marker for North Scituate Village, The FONSV would like to see this area utilized by residents and businesses in these ways to improve the village:

1. Historical Significance: There will be a historical sign placed in the area, explaining the history of train the North Scituate and highlighting maps of other places of historical importance in the town. This area will become a welcoming place for all visitors.
2. Open Space & Recreational Use: Currently the town has 4 benches at the edge of the parking lot before the cross walk to Mordecai Lincoln Road. There are several benches near the clock on Henry Turner Bailey Road and a few benches are in the North Scituate Playground. The FONSV propose a new seating area under the train canopy with two picnic tables and two benches, where people can gather; buy food at nearby Dribbles, Cosmos, Circes Grotto, Board 143 or Marylou's, and enjoy watch the train go by.
3. One of the proposed signage will incorporate the Grand Loop, a continuous walking or biking route that almost entirely encircles east of Route 3A. It can also show destinations such as beaches, ball fields, etc.
